

# MedFit 2019

## 25 & 26 Juin 2019

### Lille Grand Palais

## What is MedFit ?

With 700 international participants from more than 25 countries, MedFIT is an opportunity to connect with international key innovators in the MedTech, diagnostic and digital health sectors.

As the leading European partnering event, MedFIT provides the ideal environment to help industry players to source early-stage assets, to facilitate the emergence of collaborative projects between big players, public research institutions, start-ups and SMEs, to increase licensing opportunities, to obtain funding and to facilitate market access.

## What EDUCAT team presented ?

**Our Technology:** You probably know the parking assistance system of a car. We were inspired to offer an obstacle alerting device for electric wheelchair.

**Market Potential Survey:** We are conducting a study to identify the benefits that the technologies developed can bring to the daily life of users as well as their economic potential. For this, we are developing a questionnaire in collaboration with our target groups.

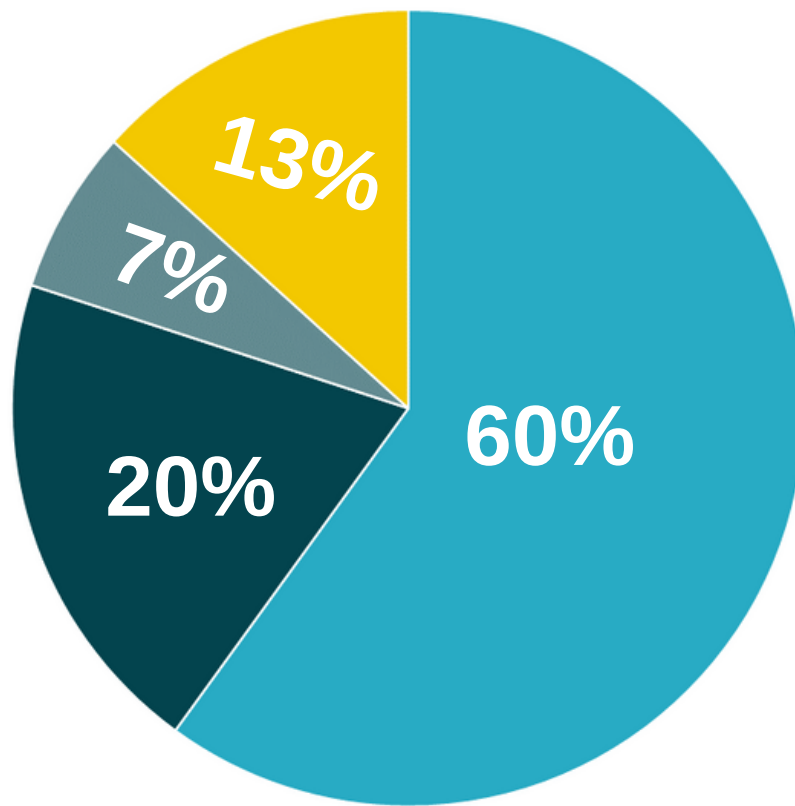

**Clinical trials:** the relevance of the technologies developed is verified by clinical tests. Currently we are conducting a study to identify the link between medical treatment, configuration and driving the chair.

**ITCH !:** because we believe that the best innovations start from a user need, we have developed a platform to build up a network which brings together people with different skills and different nationalities. You can use this platform to share your ideas or to contribute to innovative projects regarding technologies for a better health.

## Who visited our booth ?

■ An SME ■ A Resercher ■ A Manager ■ A Network
